OVERVIEW
Passionate Full-Stack Web Developer experienced in building scalable, high-performance web applications. Skilled in JavaScript, TypeScript, React, Next.js, Node.js, Express.js, and MongoDB. Committed to writing clean code and delivering smooth user experiences with efficient backend systems.

SKILLS
Frontend: JavaScript,TypeScript, React, Next.js, Redux, Tailwind CSS, Shadcn, Ant Design, HTML, CSS
Backend: Node.js, Express, MongoDB, Mongoose
Tools: Git, GitHub, VS Code, Postman
Soft Skills: Active Listening, Teamwork, Time management, Effective communication

---

PROJECTS

1. ReCycleMart   **Live Frontend Backend**

A secure, user-friendly platform for buying and selling used goods. Sellers get easy listing tools, while buyers enjoy real-time tracking, transaction history, and safe payments—all for a smooth, worry-free experience.

- Seller Features: Add, update, or delete product listings; track sales status; receive payments securely. Requires registration/login for selling.
- Buyer: Browse & purchase items via SSLCommerz payment, order history, and track transaction status.
- Role-Based Dashboard: Separate Buyer, Seller & Admin panels. Admin manages users & analytics via a responsive dashboard with charts.

Technologies: ReactJS, NextJS, Redux, TypeScript, Tailwind CSS, Shadcn, Node.js, Express, MongoDB, Mongoose, JWT, SSLCommerz

2. BookStack   **Live Frontend Backend**

BookStack is a complete online bookstore where users can browse books by category or author, search, filter, and place orders. Admins can manage books, users, and orders through a secure dashboard.

- BookStack is a full-featured e-commerce platform with product search/filtering, sorting, and pagination. Users can add to cart, place orders via SSLCommerz payment, and view order history.
- Implements JWT with protected routes, user profiles, order dashboards, and role-based access control.
- Admin: Role-based user/product/order management with real-time Chart.js analytics dashboard.

Technologies: React, Redux, TypeScript, Ant Design, CSS, Express, MongoDB, Mongoose, JWT, SSLCommerz

3. MartPlace   **Live Frontend Backend**

MartPlace is an online marketplace where users can view, apply for, and manage job postings. Only authenticated users can add jobs, approve applications, and manage job posting.

- Authenticated Job Posting – Only logged-in users can add and manage job posting.
- Job Application System – Users can view available jobs and apply directly through the platform.
- Application Management – Job posters can approve, reject, or manage incoming applications easily.

Technologies: JavaScript, React, Tailwind CSS, NodeJS, Express, MongoDB, JWT, Firebase, JWT

COURSES

Complete Web Development | 2023   **Next Level Web Development | 2025**
Programming Hero (Lavel-1, B-8)   Programming Hero (Lavel-2, B-4)

LANGUAGE

Bengali (Native proficiency)   **English** (Professional working proficiency)
