OVERVIEW

Passionate Full-Stack Developer with 2+ years of experience in building scalable, high-performance web applications. Dedicated to crafting clean, efficient code and intuitive user experiences. I combine technical expertise with a problem-solving mindset to turn ideas into impactful digital solutions.

SKILLS

Front-End: React, Redux, Next.js, Tailwind CSS, JavaScript,TypeScript, Shadcn

Back-End: Node.js, Express, MongoDB, Mongoose

Tools: Git, GitHub, VSCode, Vercel, Firebase, Postman

PROJECTS

1. **ReCycleMart** *(Buying & Selling Used Items)*   **Live Visit**   **Client Code**   **Server Code**

ReCycleMart – A secure e-commerce platform for trading used goods, enabling sellers to manage listings and buyers to track purchases. Features real-time status updates, transaction history, and safe payment processing for a seamless user experience.

- Seller Features: Add, update, or delete product listings; track sales status; receive payments securely. Requires registration/login for selling.
- Buyer Features: Browse & purchase items via SSLCommerz payment, view order history, and track transaction status.
- Role-Based Dashboard: Separate Buyer, Seller & Admin panels. Admin manages users & analytics via a responsive dashboard with charts.

Technologies: ReactJS, NextJS, Redux, TypeScript, Tailwind CSS, Shadcn, Node.js, Express, MongoDB, Mongoose, JWT, SSLCommerz

2. BookStack *(E-Commerce Platform)*   **Live Visit**   **Client Code**   **Server Code**

BookStack is a complete online bookstore where users can browse books by category or author, search, filter, and place orders. Admins can manage books, users, and orders through a secure dashboard.

- BookStack is a full-featured e-commerce platform with product search/filtering, sorting, and pagination. Users can add to cart, place orders via SSLCommerz payment, and view order history.
- BookStack implements JWT authentication with protected routes, user profiles, order dashboards, and role-based access control.
- BookStack Admin: Role-based user/product/order management with real-time Chart.js analytics dashboard.

Technologies: React, Redux, TypeScript, Ant Design, CSS, Node.js, Express, MongoDB, Mongoose, JWT, SSLCommerz
